

BICOM[®]

For testing and treatment!

THE GENTLE HELP FOR ALLERGIES!

For your well-being

A close-up photograph of a young man with light brown hair and a slight beard, wearing a light blue button-down shirt and a grey fedora hat. He is smiling warmly at the camera while holding a red and yellow apple to his lips. The background is a soft-focus green, suggesting an outdoor setting like a garden or park.

WHEN THE IMMUNE SYSTEM OVERREACTS

What are allergies?

An allergy often occurs without warning. In GERMANY, one in three people are now suffering from it.

Every person has an endogenous immune system. It automatically compensates for an exceptional amount of influences without us feeling anything.

It can however happen that the immune system overreacts and responds to one or more foreign substances. In such cases, environmental substances that are actually harmless, suddenly trigger annoying complaints.

The result is allergies that, in the worst case, manifest themselves chronically. Those affected suffer from unclear health problems or even serious physical symptoms

Allergic diseases have increased sharply in recent years and are already referred to as a „widespread disease“. So-called inhalation allergies, such as hay fever, are particularly well known and widespread.

The reasons for why a person develops an allergy have not been conclusively researched. Genetic factors probably play a role, but so do certain lifestyle habits or environmental stresses.

With early allergy detection, the right measures can be taken in time.

BICOM bioresonance method: painless, gentle, cause-oriented

*The BICOM bioresonance method is a biophysical method for diagnosis and treatment of allergies.
It is a very suitable addition to conventional medicine methods.*

Both testing and treatment are absolutely painless and therefore perfectly suitable for children. In addition, there are no known harmful side effects.

The treatment is performed with a BICOM device. Most patients even find it pleasant. The number of treatments depends on the severity of the clinical picture and the duration of the disease.

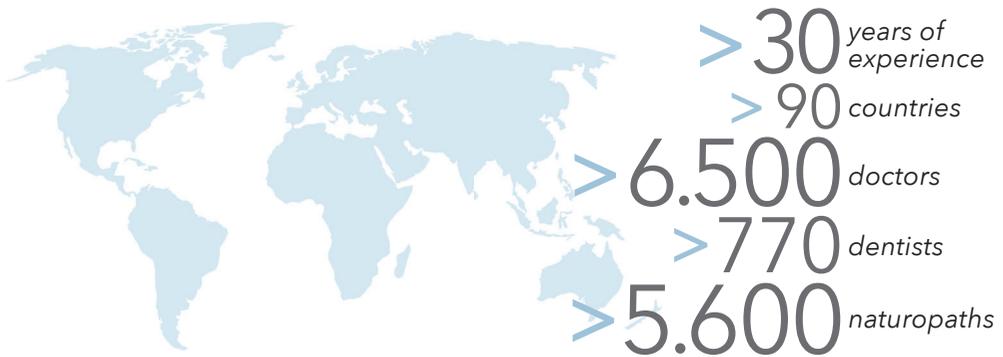

GENTLE AND
SIMPLE METHOD
FOR OVER 30 YEARS

The specialist for allergies

The BICOM bioresonance method is very well suited to counteract allergies according to numerous available application observations.

The BICOM bioresonance method has been constantly refined over the past decades in cooperation with doctors and naturopathic practitioners across specialties. It is used worldwide to alleviate complaints and to help allergy patients more comprehensively.

Co-payments

Many private health insurance companies and supplementary insurance companies cover the costs of BICOM bioresonance treatment. National health insurances usually do not cover the costs.

The best thing to do is to ask your health insurance company, after consulting your doctor or naturopathic practitioner, whether and to what extent costs are covered.

(Practice stamp)

THE BICOM® BIORESONANCE IS JUST LIKE HOMEOPATHY, ACUPUNCTURE AND OTHER METHODS OF COMPLEMENTARY THERAPY DIRECTIONS IN THE FORM OF REGULATORY MEDICINE. WITHIN THE SPECIAL THERAPY, BICOM® BIORESONANCE THERAPY IS RECOGNIZED AS A PROVEN THERAPY METHOD. IN CONVENTIONAL MEDICINE, HOWEVER BICOM® BIORESONANCE HAS NOT BEEN SUBJECT TO SCIENTIFIC RESEARCH AND IS NOT YET RECOGNIZED.
